

How congestion pricing will benefit East Brooklyn

BROWNSVILLE • CANARSIE • CYPRESS HILLS • EAST NEW YORK

New York City's transit system is in crisis

Congestion pricing is a realistic step we can take to reduce traffic, cut air pollution, and increase funding for public transportation.

- ▶ **Congestion pricing** would charge drivers entering Manhattan below 60th Street at certain times, and use the revenue for citywide transit improvements.
- ▶ **If congestion pricing is not passed, transit fares will need to rise by 27%** to pay for essential projects, according to the MTA.
- ▶ **In London**, congestion pricing has improved transit, reduced traffic congestion by 15%, and reduced greenhouse gas emissions by 20%. In Stockholm, traffic congestion decreased by 22% and childhood asthma rates dropped by 50% after congestion pricing started.

Improvements are planned — but need funding

These MTA projects are underway or already completed:

- ▶ More reliable train service on the L line after the closure in 2019
- ▶ Elevator upgrades at the East NY Bus Depot to bring them into a state of good repair
- ▶ Replace the roof and upgrade compressed natural gas equipment at Spring Creek Depot
- ▶ Provide new intercoms so customers can speak directly to transit employees for information or emergency assistance

Many of these projects are delayed or in need of additional money to proceed:

- ▶ More reliable train service on the A and C lines
- ▶ Purchase over 3,000 new subway cars to improve reliability and customer experience on the 3, A and C lines
- ▶ Up to 1.5 hours of time savings for Brooklyn express bus riders each week
- ▶ Over 180 fully accessible (ADA) stations system-wide in 10 years

Help New Yorkers get where they need to go — Get congestion pricing passed in 2019!
