How congestion pricing will benefit Southwest Queens

New York City’s transit system is in crisis

Congestion pricing is a realistic step we can take to reduce traffic, cut air pollution, and increase funding for public transportation.

- **Congestion pricing** would charge drivers entering Manhattan below 60th Street at certain times, and use the revenue for citywide transit improvements.
- If congestion pricing is not passed, transit fares will need to rise by 27% to pay for essential projects, according to the MTA.
- In London, congestion pricing has improved transit, reduced traffic congestion by 15%, and reduced greenhouse gas emissions by 20%. In Stockholm, traffic congestion decreased by 22% and childhood asthma rates dropped by 50% after congestion pricing started.

Improvements are planned — but need funding

These MTA projects are underway or already completed:

- More reliable train service on the E, F, M, and R lines
- Provide new intercoms so customers can speak directly to transit employees for information or emergency assistance
- Full accessibility (ADA) at Woodhaven Boulevard J/Z station

Many of these projects are delayed or in need of additional money to proceed:

- Up to 1.5 hours of time savings for Queens express bus riders each week
- Upgrades making subways safer from flooding and other emergencies
- Over 180 fully accessible (ADA) stations systemwide in 10 years
- Purchase over 3,000 new subway cars

Help New Yorkers get where they need to go — Get congestion pricing passed in 2019!
